With solar on a 3-phase house, it's an efficient design to only back up one of the phases, with all your essential loads on that phase 1. Perhaps Wiring Will Decide Your Needs. Where you may need 3-phase backup from a battery is if you have a specific 3-phase load, like a fire pump, or if the wiring in your premises covers different floors.

2 ???· This growing demand is said to be driven by advances in battery technology, which have led to longer driving ranges and shorter charging times, making EVs more practical for everyday use. ...
