

4 20ma display with relay output

REX-C900 series digital temperature controllers have electromagnetic relay, SSR, 4-20mA, SCR (zero crossing pulse) output type. If you want to order these digital temperature controllers, need specify.

XMTD-7931 digital temperature controller has 4-20mA output type, 2 alarm alarm quantity, multiple inputs+220VAC supply voltage features. If you are looking for this digital temperature controller, can check.

T80 series single loop single beam process controllers have 0 alarm, 2 alarms, 4 alarms alarm quantity, none, RS485 communication, none, 4-20mA, 0-10mA, 1-5V, 0-5V output type. If you want to order these single loop single ...

3. Over-limit alarm: RS485 temperature and humidity display panel adopts standard ModBus-RTU communication protocol, supports display panel shell, sound and light alarm display panel shell, relay display panel shell (relay ...

XMTA-JK4 series digital temperature controllers have 0 alarm, 1 alarm alarm quantity, multiple inputs input type, electromagnetic relay output, SSR output output. If you want to order these digital temperature controllers, ...

XMTD-7911 digital temperature controller has 4-20mA output type, 1 alarm alarm quantity, multiple inputs+220VAC supply voltage features. If you are looking for this digital temperature controller, can check.

Install an option card for additional fieldbus compatibility, analog output, relay board, dual serial outputs or 24-channel digital inputs/outputs. With two different enclosure types to ...

REX-C700 series digital temperature controllers have electromagnetic relay, SSR, 4-20mA, SCR (zero crossing pulse) output type. If you want to order these digital temperature controllers, need specify.

4. Flexible Output Options Whether you're integrating into a PLC, SCADA system, or simply using a display, make sure the flow meter offers: Flexible output options are essential for integrating ...

Rice Lake 920i Weight Indicator The 920i weight indicator and process controller blends revolutionary user interfaces, total flexibility and processing performance with the simplicity of a basic weight indicator. A crisp, ...

A Flow Totalizer and Universal Batch Controller is used to measure and display the total flow of liquid or gas and to control the batching process based on set quantities. It integrates flow monitoring with automated batch ...

4 20ma display with relay output

PLC (Programmable Logic Controller) is a digital control system that replaces complex hardwired relay logic with a flexible, programmable solution. It stores instructions to control industrial ...

CH402 series digital temperature controllers have electromagnetic relay, 2 electromagnetic relay, SSR, 4-20mA, SCR output type. If you want to order these digital temperature controllers, need specify.

REX-C410 series digital temperature controllers have k (0-400?), k (0-1200?) input type and range, electromagnetic relay, SSR, 4-20mA, SCR (zero crossing pulse) output type. If you want to order these digital temperature ...
