The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

The cost of solar energy systems has fallen dramatically over the past decade. As solar electricity has become more affordable, residential solar adoption has increased, with more than 2 million solar energy systems currently operating across the United States as of 2019.
