What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

Achieve energy independence with solar installation from AJ Renewables. Choose us for your EV charger and solar power upgrades and enjoy insurance-backed warranties. Our Partners & Products. Find our list of tried and tested ...

AJ BRAND, a group with two companies, AJ Renewables and AJ Construction, is dedicated to sustainable and renewable energy solutions. The group started as an electrical subcontractor, AJ Construction, but soon became a respected EPC contractor with a strong brand image in the Renewable energy field. In 2021 was created AJ Renewables.

Approximately 6% of primary energy in French Polynesia is generated from renewable energy sources. Approximately 30% of electricity is generated renewably, primarily Hydroelectricity and solar power. Renewable generation is concentrated on Tahiti, with other parts of French Polynesia almost entirely reliant on fossil fuels. Wind power is not used, with only two small facilities, ...

French Polynesia Total Energy Consumption: Nuclear, Renewables and Other: Renewables and Other data is updated yearly, averaging 0.000 BTU qn (Median) from Dec 1980 to 2022, with 43 observations. The data reached an all-time high of 0.001 BTU qn in 2010 and a record low of 0.000 BTU qn in 1982.
