Lithium is the lightest of all metals, has the greatest electrochemical potential and provides the largest specific energy per weight. Rechargeable batteries with lithium metal on the anode could provide extraordinarily high energy densities; however, it was discovered in the mid-1980s that cycling produced unwanted dendrites on the anode.

Ajay Solar inverter is an inverter designed to operate with a single PV module The micro-inverter converts the direct current output from each panel into alternating current We have Inverters of 400 Volt to 1000KV Our Inverters obtain maximum power for any given environmental conditions.
