

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.

Does Kosovo have a power exchange with Albania?

After the agreement between KOSTT - ENTSO-E, Kosovo made a joint with Albania and the 400 kV interconnection known as "Energy Highway" (or in Albanian "Autostrada Energjetike"), which was finished in 2016, but it was enabled in 2020, opening the way for the establishment of a joint power exchange between Kosovo and Albania.

How can Kosovo improve its energy sector?

The Group's commitment to helping Kosovo improve its energy sector is broad: projects are designed to improve energy efficiency, ease the policy and regulatory environment for renewable energy and energy efficiency, address the environmental legacy of the old power plants, upgrade power generation to meet demand, and improve water supply.

What are the power plants in Kosovo?

The greatest part of generation capacities of Kosovo are the two power plants: Kosova A and Kosova B. The capacities of the two power plants are lower than the installation parameters level, because of the outdated system and lack of maintenance during the last decade of the 20th century.

What does Kosovo's Energy Strategy look like?

The Government of Kosovo is currently finalizing a long-awaited energy strategy where it is expected to announce the eventual decommissioning of one of the coal-fired power plants, set a renewable energy target for 35 percent of all electric energy consumption by 2031, and further integrate in regional energy markets.
