Over the years, you've likely heard plenty of discussion of the approximately 860 million people who lack basic access to electricity, including 600 million in Sub-Saharan Africa. This energy poverty has been a major barrier to economic development across the region, and continues to cause a significant drag on both social and health outcomes.

In 2016, the American Samoa Renewable Energy Committee set a goal to meet 50% of American Samoa's energy from renewable energy resources by 2025 and 100% by 2040, primarily with solar energy. In 2022, per capita electricity consumption in American Samoa was about 30% of the U.S. average.
