Why should I buy a GIV-gateway?

By purchasing the additional Giv-Gateway, the All in One can provide whole house backup in the event of a power failure. The Giv-Gateway provides seamless switching between grid and battery ensuring that your property is always powered.

How does the GIV-gateway work?

The Giv-Gateway ensures continuous power supply to your property by enabling smooth transitions between the grid and battery. Additionally, the Giv-Gateway acts as a connection hub for your solar PV system, enabling it to keep producing energy even in the absence of a grid supply. ABOUT THE MANUFACTURER

How do I connect givgateway & AIO?

Both Gateway and AIO are connected via LAN. There is a LAN cable between the Gateway / AIO. Thanks in advanced for your time reading. Hey, I recently had a GivGateway installed along with a 13.5kwh AIO battery. There were a many issues with commissioning to the point the AIO was going to get RMA'd but everything finally seem to come online.

The Giv-Gateway should be installed between the customer's supply meter and the consumer unit. The meter tails between the meter position and Givenergy Gateway should not be longer than 3 metres. If the length is more than 3 metres, you should install an additional protective device at the nearest point to the supply inside the customer's
