

Aquila energy Sweden

Did Aquila Capital buy a wind farm in Sweden?

Hamburg-based investment and asset development company Aquila Capital said today it has advised a Swiss investment foundation on its acquisition of a 24-MW wind farm in southwestern Sweden. Aquila Capital has acquired the asset on behalf of the foundation from an associate of Prime Capital AG and will manage it going forward.

What makes Aquila a good wind farm?

"Due to its outstanding location, less than 100 km from the Baltic Sea and close to the largest lake in Sweden, Lake Vanern, this wind farm has a capacity factor comparable to some offshore wind farms," commented Maurice Jackel, Senior Manager, Partnership and Portfolio Advisory at Aquila Clean Energy EMEA.

Does Aquila Capital have a relationship with infrastructure investors?

The transaction establishes an ongoing relationship for Aquila Capital with two highly regarded infrastructure investors and confirms Aquila Capital's ability to deliver large-scale portfolios.
