

Solar energy is becoming an increasingly popular source of electricity in Australia. As of 2023, rooftop solar photovoltaic (PV) systems account for over 10% of Australia's electricity supply, ...

The Australian government has maintained its faith in SunCable's plans to build one of the world's largest solar and battery energy storage projects, complete with the world's largest subsea...

A Virtual Power Plant is essentially a network of distributed energy resources (like home batteries, solar panels, EV chargers, smart appliances) that are coordinated via software to function as a ...

Forecasts for performance and PV contribution to demand are only shown at State (not 2-digit postcode) level. Solcast provides more detailed forecasts of power output and irradiance for large and small scale solar, for ...

A densely populated region in Asia, with very limited space for large solar parks or other large-scale renewable energy infrastructure, scarce natural resources, and heavy reliance on energy ...

China-headquartered Trinasolar is seeking development approval to build what would be the biggest solar farm in Western Australia, as well as one of the largest battery energy storage projects in the state to cater for an anticipated 1.8 GW ...

Intellihub is proud to announce a groundbreaking partnership with Bunnings to launch Zelora --a new solar and battery subscription service designed to make home electrification more ...

Solar power is becoming an increasingly popular choice for Australians to begin generating renewable energy at home. Australia is also conveniently well-suited for solar energy thanks to its ample sunlight and wide ...

The International Renewable Energy Agency's latest report finds little change in the global average levelised cost of electricity for utility-scale solar plants year-on-year, while the global ...

Generation from renewables has increased significantly over the past decade. The composition of renewable energy in Australia has diversified significantly as wind and increasingly solar capacity has come online, with the ...

Renewables developer Edify Energy has unveiled plans for a major 2.4 GWh solar and integrated battery energy storage facility in Australia, adding to its growing portfolio of power generation ...
