

How much energy does Azerbaijan need?

Azerbaijan's energy demand (measured as total energy supply [TES]) was 16.1 million tonnes of oil equivalent (Mtoe) in 2022 (according to preliminary data from the State Statistical Committee). Azerbaijan is a major producer of crude oil (32.7 Mt including natural gas liquids in 2022) and of natural gas (35.0 bcm in 2022).

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

How much electricity is produced in Azerbaijan in 2022?

Electricity generation in Azerbaijan has increased by more than 50% since 2010, amounting to 29.0 TWh in 2022. It is mostly generated by natural gas (more than 90% in 2022). Azerbaijan's sole refinery produced around 6.5 Mt of oil products from domestic crude oil and natural gas liquids in 2022.

What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

What is Azerbaijan's energy potential?

According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually. Azerbaijan's Renewable Energy Agency under the Ministry of Energy (formerly SAARES) states that the country has up to 800 MW of geothermal energy potential.

What is Azerbaijan's energy regulatory agency?

In 2017, the President of Azerbaijan signed a decree establishing the Energy Regulatory Agency under the Ministry of Energy to regulate relationships among producers, suppliers and transmission system operators and distributors, as well as customers in the field of electricity, heat and gas supply.

Azerbaijan shines on the global stage as a hub for sustainable energy, declared Azerbaijani Energy Minister Parviz Shahbazov on X, Azernews reports. Reflecting on the transformative journey of Azerbaijan over the past three decades since the inception of the International Caspian Oil and Gas Exhibition, Minister Shahbazov remarked on its evolution ...

As is known, the two countries have large power systems, and interconnecting these power lines could create a giant hub for power in the region which can prevent energy losses. It should be emphasized that the project coincides with Azerbaijan's current vision and the country can unquestionably get benefits through the realization of the project.

Expanding energy ties. Azerbaijan (population 10.3 million), which is the host of this year's global climate summit COP29, is the epitome of a country experiencing carbon lock-in. Oil and gas production contributes roughly half of the South Caucasus republic's GDP and half of all its national budget revenues, as well as more than 90 percent of its export earnings.
