

For grid operators, developers and investors, the idea of repurposing the flood of retired electric-vehicle (EV) batteries into stationary battery-energy-storage systems (BESS) promises lower...

An older, high-mileage EV becomes a prime candidate for the recycling and recovery of critical materials from its battery, repurposing them into "second-life" use cases--think stationary ...

US President Donald Trump has declared his disdain for electric vehicles (EVs) and with sales disappointing, carmakers who invested heavily in battery production could follow General ...

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power. This project is scheduled for grid readiness ...

House of Commons Publishes Update on BESS Battery Fire Risks On June 26, 2025, the House of Commons released an update regarding the fire risks associated with Battery Energy ...

Maximizing value from battery energy storage systems (BESS) isn't just about having the right hardware - it's about executing the right strategy. Lennard Wilkening, CEO and co-founder of ...

"Many of the indicative offers submitted through nTeaser are conditional on successful participation in [the] MACSE [Mercato a termine degli stoccaggi, auction], highlighting the central role of this mechanism in de-risking BESS ...

That sentiment summarized the German deep-dive session, "Flexible Access, Stable Revenues - Grid Connection Solutions for BESS," at the Battery Business & Development Forum 2025 in ...

India awarded 5.4 GW of colocated solar plus battery energy storage systems (BESS) and 2.2 GW of standalone BESS to developers in the first half of 2025. This marks the nation's highest BESS allocation to date, says a new report by ...

Glint Solar has added a new battery energy storage noise-modelling feature to its utility-scale planning software platform. The new tool is meant to support project developers during early ...

The UK developer has reached financial close on a £140 million (\$188 million) facility for its 360 MW/720 MWh battery storage asset. The facility has been provided by Private Credit at Goldman Sachs Alternatives. Meanwhile, ...

The collaboration will evaluate whether batteries from Silence-brand electric scooters, part of Acciona

BESS Second-Life Batteries

Energia's fleet, can be reused for stationary, less power-intensive storage applications ...

A Battery Energy Storage System (BESS) is a sophisticated setup that stores surplus electricity in rechargeable batteries, usually lithium-ion, and supplies it back to the grid or users when ...

States such as NSW, VIC, and QLD could prioritise scaling up recycling capacity and enhancing logistics infrastructure, while WA's distinctive BESS-heavy profile highlights the ...

Transgrid, Australia's largest electricity transmission network operator, working in the state of New South Wales, has chosen grid-forming batteries and synchronous condensers as its preferred ...

Vilnius-based utility Ignitis Group will install 291 MW/582 MWh of total battery energy storage system (BESS) capacity at two of its wind farms and at a hydro site, with commercial operation ...

Envision Energy, a global leader in green technology, announced today that it has executed two supply agreements to provide Lithium Iron Phosphate (LFP) containerised battery energy ...

BESS Second-Life Batteries
