

Hybrid uses petrol and a smaller battery to recharge a standard internal combustion engine. Hybrid vehicles have consumption that increases by about 25% compared to standard internal ...

The EUR 117.9 million contract, announced recently, will see the delivery of five electro-diesel vehicles, four electro-battery trains, and four pure battery units. This significant investment, ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

According to the SMMT, 24.8% of new cars registered in the UK in June 2025 were pure battery-electric vehicles (BEVs) whilst just 5.6% were diesels. Plug-in hybrids accounted for 11.2%.

Guidance for car manufacturers on how to apply for their vehicles to be eligible for the Electric Car Grant. The guidance explains: how the scheme works vehicle eligibility the application process ...

The European Parliament's decision to ban the sale of new internal combustion engine (ICE) cars by 2035 is a bold move, signaling a significant pivot towards electric vehicles (EVs) as part of the EU's ambitious climate goals.

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

The main input is battery power consumption and electric vehicle availability for charging. In this way, energy demand from electric transport and intermittent energy generation can be ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

Hydrogen vs. Batteries: Is the Future of Cars Fuel Cells or Charging? The automotive industry is in a whirlwind of change, with electric vehicles (EVs) taking center stage. But while battery ...

This paper explores the implementation of battery electric vehicles (BEVs) in underground mining operations, focusing on their benefits, challenges, and safety considerations. The study ...

Battery electric vehicles bevs croatia

As the push for sustainable transportation intensifies globally, a new study from the International Council on Clean Transportation (ICCT) reveals that battery-electric vehicles (BEVs) in Europe ...

A consortium is seeking an Original Equipment Manufacturer (OEM) as a partner that can cover all vehicle-related activities in a Horizon Europe project focusing on the design and integration ...
