

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

Guidance for car manufacturers on how to apply for their vehicles to be eligible for the Electric Car Grant. The guidance explains: how the scheme works vehicle eligibility the application process ...

Electric vehicles (EVs) are revolutionizing the way we think about transportation, offering an eco-friendly alternative to traditional gasoline-powered cars. These vehicles run on electricity ...

Okay, now what about electric and plug-in hybrids? The company plans to offer 15 battery electric vehicle (BEV) models by 2027, compared to the five it currently offers. Two of these new BEVs ...

Battery electric vehicles (BEVs) remain the primary driver of growth in the European alternative fuels market. BEV sales outpaced plug-in hybrid electric vehicle (PHEV) growth, reflecting ...

Leapmotor currently sells the T03, B10, C01, C10, C11, and C16 models in China. Except for the T03 and B10, which are only available as battery electric vehicles (BEVs), all other models are also available as extended-range electric ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

"The good news is a hydrogen vehicle is an electric vehicle," says Guldner. "It's just a different way of storing the energy versus a battery, which also means that we can reuse a lot of the ...

In China, electric vehicles are especially affordable due to government subsidies, low electricity prices, and cost advantages from mass production. In contrast, high electricity costs and the...

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

Battery Electric Vehicles (BEVs) now dominate powertrain installations, making up nearly 71% of the total demand across major regions. Battery packs account for about 38% of the market ...

China leads the BEV market with 57% of global registrations, followed by Enlarged Europe\* (22%) and the U.S. (12%), while other countries remain below 2%. Regional differences stem from ...

The global electric vehicle (EV) market is witnessing a significant resurgence, with sales in the first half of the year exceeding 5.9 million battery electric vehicles (BEVs), according to a ...

Imports of battery electric vehicles (BEVS) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

Looking Ahead The EU car market in H1 2025 highlights a clear pivot toward electrified vehicles, with hybrids leading the charge and battery-electric models steadily gaining ground. However, ...

China's BYD said on Tuesday it delivered 382,585 vehicles globally in June, marking a 10.5% increase from the same month last year. Of the total, 377,628 were passenger vehicles, ...

This lineup will include six battery electric vehicles (BEVs), two plug-in hybrid electric vehicles (PHEVs), two range-extended electric vehicles (REEVs), and one internal combustion engine ...

Hydrogen fuel cell cars (FCEVs) have been on the market for a similar duration to the current wave of battery EVs (BEVs). But they have sold a tiny fraction in comparison. In 2024, 12,866 ...

The European Commission announced on Wednesday that Chinese-made battery electric vehicles, or BEVs, will soon be subjected to punitive countervailing tariffs, after the conclusion of the bloc's anti-subsidy ...

Between January 1st and April 30th 2025, registrations and market share grew across all electrified powertrain types (BEV, PHEV, and HEV). BEVs saw the largest YoY increase (35.2%) - and a 5% increase in market share ...

Unlike plug-in hybrids, BEVs run exclusively on electricity stored in large-capacity battery packs and emit zero tailpipe emissions, helping countries move closer to net-zero goals. Automakers ...
