

China restricts battery cathode material technology exports Beijing has added battery cathode material preparation technology to its restricted export list. The move affects lithium iron ...

China has introduced new restrictions on the export of battery cathode material preparation technologies, including those related to lithium iron phosphate (LFP) and lithium manganese ...

IDTechEx Research Article: The future of energy could be increasingly streamlined, sustainable, and efficient, with battery developments and the integration of machine learning. This article explores the future of energy, from ...

Even as the United States lifts restrictions on advanced AI chips, the PRC is tightening export restrictions on technologies critical for producing electric vehicle batteries. This move will ...

China has imposed export restrictions on eight key EV battery technologies as the country seeks to consolidate its dominance in the global EV race. The move makes it harder for Chinese ...

Integrated battery technologies encompass both battery pack and body integration methods, with Cell to Pack (CTP) and Cell to Body (CTB)/Cell to Chassis (CTC) being prominent forms. With...

The new generation of battery technology is central to China's success in building electric cars that are considerably cheaper than electric and gasoline-powered cars made in other countries.

Panasonic unveils its new Kansas EV battery factory, boosting production with 32 GWh capacity plans. North America's largest advanced battery trade show and conference brings together engineers, business leaders, top ...

Several factors contribute to this high battery consumption including the app's graphics rendering, network usage, and background operations. Understanding these elements is crucial to ...

Octillion Power Systems, a California-based supplier of high-density lithium-ion battery packs for electric vehicles of all types, has expanded its existing partnership with Vision Marine ...
