

# Battolyser bv Cabo Verde

Who is the CEO of battolyser systems?

Mattijs Sleeis the CEO of Battolyser Systems. Where is Battolyser Systems headquartered? Battolyser Systems is headquartered in Schiedam, Netherlands. What is the size of Battolyser Systems? Battolyser Systems has 108 total employees.

Where is battolyser Systems headquartered?

Battolyser Systems is headquartered in Schiedam, Netherlands. What is the size of Battolyser Systems? Battolyser Systems has 108 total employees. What industry is Battolyser Systems in? Battolyser Systems's primary industry is Other Energy. Is Battolyser Systems a private or public company? Battolyser Systems is a Private company.

What is battolyser's?

Battolyser's is a 100% flexible electrolyser with integrated battery capacity. It can follow highly volatile renewable energies and switch instantly and safely between hydrogen production and electricity discharge, leading to the lowest LCOH.

Is battolyser systems growing?

Battolyser Systems may be growing as it has secured a significant amount of funding, specifically EUR40M from the European Investment Bank. This influx of capital indicates a strong financial backing and confidence from investors in the company's potential within the clean energy sector.

Why should you invest in battolyser systems?

The funding could be utilized to enhance research and development, scale up production, or expand into new markets, all of which are typical indicators of a company in a growth phase. View contacts for Battolyser Systems to access new leads and connect with decision-makers.

Is battolyser safe?

Battolyser's is intrinsically safe in any operational mode, even at low and rapidly changing loads. Its patented Nickel-Iron technology is inherently robust and has industry leading efficiency and durability. Battolyser Systems can be a major accelerator for the EU to reach its goals on climate, industry, strategic autonomy and economic growth.

Le système Battolyser, créé aux Pays-Bas, constitue une véritable innovation qui permet d'associer batteries et production d'hydrogène propre, le tout avec de belles capacités d'adaptation.
