

Behind the meter generation

Stay Informed! Read the Latest 475 MW Behind-the-Meter Power Site in DFW Seeks Offtaker Amid Soaring Data Center Energy Needs PR News from Brazil, Bahrain. Get the Full Story, ...

Stay Informed! Read the Latest 475 MW Behind-the-Meter Power Site in DFW Seeks Offtaker Amid Soaring Data Center Energy Needs PR News from Ireland, Qatar. Get the Full Story, ...

The global behind-the-meter (BTM) market size was valued at USD 370.02 billion in 2024 and is estimated to grow from USD 528.94 billion in 2025 to reach USD 9223.22 billion by 2033, ...

Stay Informed! Read the Latest 475 MW Behind-the-Meter Power Site in DFW Seeks Offtaker Amid Soaring Data Center Energy Needs PR News from Saudi Arabia, Bahrain. Get the Full ...

All loads should pay for a portion of transmission, "regardless of whether they're co-located or have behind the meter generation," said Clif Lange, general manager of South Texas Electric ...

SACRAMENTO - Governor Gavin Newsom today announced California achieved an historic milestone - the state was powered by two-thirds clean energy in 2023, the latest year for which data is available. California is the largest economy in ...

Peters said MISO still needs to add historical meter data on demand reductions and behind the meter generation from LSEs to get the full picture of net settled load to provide allocation ...

Solar represents the technology with the largest amount of installed renewable energy capacity in the state - over 21,000 MW of solar capacity operates the electric grid, and another 19,000 ...

Amid these challenges, some data centers are rethinking their approach by adopting behind-the-meter (BTM) configurations, where power generation and consumption occur on the same ...

Therefore, the decision to invest in on-site generation and pursue behind-the-meter PPAs is not just a sustainability initiative - it is the practical measure, one that will define the sector's ...

They are therefore incentivized to shift their electricity use away from peak periods or to install behind-the-meter generation or storage to reduce their net electricity demand during peak ...

The long-term agreement aims to develop front-of-the-meter generation powered by natural gas from the Marcellus and Utica shale formations which sit below the surface of Pennsylvania, ...

Behind the meter generation

Behind-the-meter energy solutions give data centers control over their power sources, offering sustainability and reliability benefits despite significant implementation challenges. Behind-the-meter energy installations at modern ...

In a rapidly evolving energy landscape - and with key decarbonisation targets on the horizon, Joulen's Electrical Engineer Jessica Fletcher explains what happens on each side of the "meter" and how these distinct systems impact our clean ...

GPC's solution: on-site, behind-the-meter generation using clean-burning, flexible natural gas. This approach offers three key benefits: Speed to Power - On-site generation bypasses grid ...

Not all data centers are content just pulling power from the grid. Some are taking things into their own hands, quite literally, by generating energy right on-site. This approach, known as...

This lecture provides an overview of the current status of the California grid and outlines the ongoing operational challenges associated with integrating renewable resources, energy ...

This problem is exacerbated by commercial and industrial customers who can engage in "behind the meter" generation as the cost of self-supply comes down. As a result, providing ubiquitous ...
