Bouvet Island, located in the remote South Atlantic Ocean, is home to a fascinating and enigmatic volcano that has piqued the interest of scientists and adventurers alike. This uninhabited island, located approximately 1,600 kilometers southwest of the coast of South Africa, is of significant geological importance due to its volcanic activity ...

Innergex Renewable Energy Inc (Innergex) is an independent renewable power producer. It develops, acquires, owns and operates hydroelectric facilities, wind farms, and solar photovoltaic facilities through long-term power purchase agreements. The company sells electricity to publicly owned utilities or other creditworthy counterparties.

Think that's a viable explanation? Why keep it so secret? Norway has the boundaries around the island in their possession, right? The phosphorus deposit is on mainland Norway and easy to verify. The only documented phosphate mineral on Bouvet Island is apatite. I don't know how relevant that is, but it's another clue, and the plot thickens.

Bouvet Island (/ ' b u: v eɪ / BOO-vay; Norwegian: Bouvetøya [3] [bu'vè:oeY?]) [4] is an uninhabited island and dependency of Norway is a protected nature reserve. It is a subantarctic volcanic island, situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, and is the world's most remote island. Located north of the Antarctic Circle, it is ...
