Many of the most interesting things to do in Seattle get overlooked by visitors and locals alike. This list of places to visit in Seattle is great for solo trips or family trips. From Seattle's Historic ...

The afterburn effect can help people burn calories to lose weight and reduce body fat by creating a calorie deficit by eating fewer calories than they burn. The number of calories burned during 1 hour of strength training varies between 100 and 400, depending on factors such as intensity, exercise selection, range of motion, and body weight.

During the recovery phase after exercise, your body uses oxygen and calories to repair muscles and replenish stores of oxygen and adenosine triphosphate (ATP or cell energy currency). This is what causes the afterburn effect, which is a beneficial phenomenon that aids in weight loss and helps build muscles.
