What is Bridge Energy?

Bridge Energy is a California based energy company that believes in developing and producing energy necessary to fuel the California economy safely, cost effectively, and with minimal environmental impacts. It was formed with the belief that California is in an energy renaissance as it transitions from fossil fuels to renewable energy.

Why should you choose bridge energies?

Fossil fuel energy remains key to our modern world and is the core of our activity. As a player in the ecological transition within our regions, Bridge energies has set itself the objective of developing and promoting the value of rethinking energy. This virtuous vision of resource exploitation marks a strong commitment for our company.

What is bridge energies' virtuous vision of resource exploitation?

This virtuous vision of resource exploitation marks a strong commitment for our company. The exploitation of new resources is a major challenge for energy players. In order to find and develop innovative cross-cutting projects, Bridge energies has created its Bridge val sector.

Does bridge energies have a legal and regulatory framework?

Bridge Energies therefore remains within the legal and regulatory framework in its applications for drilling works. Requests to extend the geographical scope of Bridge Energies submitted since 2016 pursuant to the provisions of articles L. 142-12 and L. 142-13 of the French Mining Code, which are unaffected by the law of 30 December 2017.

What does bridge Energy believe is important for California's long-term energy security?

Bridge Energy considers it essential for California's long-term energy security that California meets a majority of its energy appetite locally. It should be a goal for California to provide as much energy locally to meet the needs of a growing California economy.

The funding provided by BRIDGE has enabled the largest energy storage unit in continental Europe, located in Deux-Acren in Belgium, to become operational very quickly. The project aims to meet the challenge of intermittent production of renewable energies, which are essential for accelerating the energy transition.

Fossil fuel energy remains key to our modern world and is the core of our activity. As a player in the ecological transition within our regions, Bridge energies has set itself the objective of developing and promoting the value of rethinking energy.

Bridge Energy is a privately held company with over 20 years of experience in the fuel industry. Our reputation as a value-added trading operation is built on reliability, market knowledge, cost-effectiveness, and
