

British Virgin Islands vmv energy

What is the Virgin Islands Energy Office?

The Virgin Islands Energy Office (VIEO) is focused on promoting sustainable energy policies in the Virgin Islands through clean energy production and distribution, energy efficiency, transportation, and energy consumption. It achieves this through outreach, financial incentives, training, and technical assistance.

Is the BVI reliant on fossil fuels?

Like many island nations, the BVI is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data The British Virgin Islands Electricity Corporation (BVIEC) was formed by ordinance in 1978.

How does Peter Island generate electricity?

The outer islands already use renewable resources to produce energy. Peter Island generates 70% of its electricity from two Wind Energy Solutions hybrid turbines rated at 250 kilowatts (kW) each, backed-up by diesel generators. Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating.

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. The chance of wet days in British Virgin Islands varies throughout the year. The wetter season lasts 7.1 months, from April 30 to December 3, with a greater than 17% chance of a given day being a wet day. The month with the most wet days in British Virgin Islands is September, with an average of 8.6 ...
