

Desay Battery Unveils Proactive-Safety-Focused Energy Storage Technologies Fears UK gas stockpile to drop for winter as British Gas owner plans sell-off China Focus: China sets up ...

Can Europe lower electricity costs without deep compromises? This dataset aggregates daily data on European natural gas import flows and storage levels. How could extending the EU ETS to non-EU countries enhance global ...

University of Antwerp, Belgium invites online Application for number of Fully Funded PhD Degree at various Departments. We are providing a list of Fully Funded PhD Programs available at ...

That's why finding a way to fast-track proposals and permits matters. More efficient project timelines mean communities benefit sooner. The Brussels meeting was a hub to analyze just ...

An automotive energy storage development center might be established in Zalaegerszeg (western Hungary), at ZalaZone, the city's state-of-the-art automotive test track. The China-U.S. Green ...

Doctoral Scholarship in Redox Flow Batteries: The University of Antwerp is offering a Doctoral Scholarship for a full-time position in the field of redox flow batteries. This opportunity is aimed ...

With the "green energy transition" high on the international agenda as world leaders convene at COP28 to discuss how to overhaul global energy systems and cut dependence on fossil fuels, momentum is growing to invest ...

The platform's founding partners include REIB, Statkraft and Sunotec The Battery Storage Europe Platform was launched with support from founding strategic partners, including Renewable ...

Google has signed its first partnership with a long-duration energy storage (LDES) company. The tech giant signed a long-term partnership with Energy Dome to support multiple commercial ...

SolarPower Europe believes that the European Union needs ten times more battery storage by 2030 to support the growth of solar and other renewable energy capacities and maintain the ...

POWEROAD is proud to announce the release of a new video highlighting its earliest commercial and industrial (C& I) energy storage project in Europe, located in Belgium.

The Global CCS Institute explores the rapid growth of carbon capture and storage (CCS) worldwide, highlighting rising project numbers, regional innovation, and global collaboration as ...

Brussels energy storage

Key Innovation: Molten salt thermal energy storage for grid-scale solar power. Benefits: Increased grid stability, reduced reliance on fossil fuels, lower energy costs for consumers, and a more ...
