Akaysha Energy Pty Ltd, the BlackRock Inc -backed Aussie battery energy developer, has been granted permits to build two battery energy storage systems (BESS) in Victoria and Tasmania totalling 300 MW/1,000 MWh.

Akaysha is a dedicated builder-owner-operator of mega-scale Battery Energy Storage Systems. With our combined expertise in energy markets, technology, development and capital solutions, we will unlock the energy future, ensuring global access to clean, reliable, and affordable energy solutions for all.

Akaysha is proposing to deploy a large-scale BESS near Wellington in central-west NSW. Known as the Orana BESS, it will have a capacity of 415MW and provide 4 hours or 1660MWh of energy storage. Akaysha is preparing to commence construction activities including road upgrades at the intersection of the site access.

We stand before you today, united by a vision to lead the energy transition towards a better, brighter tomorrow. If you are looking to join a team where the work you do makes a real and very tangible impact on the future of the planet and its people, we'd urge you to not only check out our open roles, but apply for one today.

Akaysha Energy commenced construction on a \$200 million Brendale Battery Energy Storage System. The company also closed an AU\$650 million deal for a 1.6GWh+ Australia BESS project. Additionally, Akaysha Energy secured an AU\$250 million debt deal and was awarded a contract for a 2GWh project.

Akaysha Energy, the battery storage developer owned by United State-based investment giant BlackRock, has reached a final investment decision (FID) and finalised a balance of plant contract for the \$150 million (USD 96.3 million) Ulinda Park project which will include a 150 MW battery, with two hours of storage at maximum output.

Akaysha is developing an advanced 100MW/200MWh BESS at the Palmerston Terminal Station in Tasmania. The BESS facility is intended to use the latest grid forming inverter technology offering Virtual Synchronous Machine (VSM) services to the Tasmanian network.

Nick Finch, Chief Engineer at Akaysha says this is a significant milestone for the Waratah Super Battery as it moves towards the testing and commissioning phase, "Completion of Waratah's connection process and registration of the NEM's largest single DUID at 850MW has taken an incredible amount of collaboration between AEMO, Transgrid, Aurecon, EKS, Powin, ...

Introducing the world's most powerful mega-scale battery storage systems; Australian born for the betterment of the planet and its people. Together, we are working with communities and project partners both locally and around the globe to ensure that every tomorrow is better by focusing on enhancing human life through the delivery of new energy today.
