

The Global CCS Institute explores the rapid growth of carbon capture and storage (CCS) worldwide, highlighting rising project numbers, regional innovation, and global collaboration as ...

In addition, we project that no bioenergy with carbon capture and storage is deployed in any of our cases, and CO₂ capture at cement facilities remains small--between 1 MMmt and 2.5 MMmt ...

Carbon capture and storage (CCS) is no longer just a future concept but is becoming a practical solution helping companies to plan cleaner energy projects and meet climate and sustainability ...

The carbon capture and storage (CCS) sector has undergone unprecedented transformation during 2023-2025, marked by record investment levels, technological breakthroughs, and ...

Looking ahead, carbon capture, utilisation and storage (CCUS) will play a key role in reducing CO₂ emission from petrochemical industry due to its direct mitigation ability and carbon utilisation ...

A recent study published in Engineering offers a comprehensive review of the synergistic impact of Carbon Capture, Utilization, and Storage (CCUS) coupled with Enhanced Oil Recovery ...

The Carbon Capture, Utilization and Storage Conference 2025 will bring together leading experts from across the industry, including: Mhairidh Evans, VP, Global Head of CCUS Research, ...

Carbon capture and storage (CCS) has emerged as a critical technology in the global effort to mitigate climate change by reducing greenhouse gas emissions. This process involves ...

"The Enping project has not only marked a significant breakthrough in CO₂ storage, but has also paved the way for future endeavors in this field," Deng said. On the basis of this ...

16 July 2025 (IEEFA) | The vast cost of planned UK carbon capture and storage (CCS) projects is being passed on to taxpayers and electricity consumers as the government doubles down on ...

Carbon capture and storage is a three-stage process--capture, transport, and storage--designed to reduce the amount of carbon dioxide (CO₂) released into Earth's atmosphere by separating it from emissions before it can ...
