

Every central battery system is designed specifically for the respective project on the basis of a modular system. This produces solutions optimised in terms of the cost and functionality of the system. The modular design of ONLITE central CPS guarantees a tailor-made solution for any project and a significantly optimised cost/functionality ratio.

When the mains voltage is interrupted or it drops under 160V, the central battery unit changes to battery use. We provide the supply installation, and maintenance of Central Battery System of all high quality makes which meet the NFPA standards and fulfils the requirement of Civil Defence regulation at an economical cost.

In a central system, battery life is maximised (usually lasting at least ten years). When battery replacement is eventually required, this is usually a quick and simple operation that avoids the disruption which can be caused by having to access and change batteries in numerous fittings.
