The installation team of Ray, Jamie, Carlos and Juan were fast, efficient, clean and sensitive to my needs regarding layout and routing of cables, etc. This was a somewhat unusual project because we had to interface new solar panels with an existing solar array and also a standby generator. The electrical work was a little more complex than usual.

Some of the key considerations for commercial solar installation include: Flat roofs: If your commercial property has a flat roof, most of the surface area can then hold panels oriented with a south-facing tilt for direct access to the sun's rays throughout the year. Financial incentives: Solar panels can reduce or eliminate electricity costs for your property, as well as offer consistent ...
