

Congo Republic online solar apply

How much solar power is available in Kinshasa?

In the area around Kinshasa there is a further 6 gWof solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa,Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

Will the DRC benefit from the Inga?

Currently the DRC only has 2.5 gW installed and no early benefitfrom the Inga. However solar and wind is available now. Existing HEP could fill in the 'gaps' when solar is not available. However offgrid power is essential in the rural areas and small towns across this vast country.

How much power does DRC need?

Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing offgrid power or 16 gWof installed solar capacity ! Same applies to clean water as only 23% have access.

Is the DRC a hydroelectric country?

This has given it enormous potential for hydro electric power and almost 100% of its grid power is HEP. The DRC is the largest country in Sub Saharan Africa occupying 2,345,000 km2 with 3.32% as standing water including rivers and lakes. Its sheer size,lush vegetation and landscape has been its problem since independence in 1960.
