Where are Cook Islands located?

Cook Islands, self-governing island state in free association with New Zealand, located in the South Pacific Ocean. Its 15 small atolls and islands have a total land area comparable to that of a medium-sized city, but they are spread over about 770,000 square miles (2,000,000 square km) of sea--an area nearly as large as Greenland.

How big are the Cook Islands?

One of the smallest nations in the world, the Cook Islands covers a total land area of 240 sq. km. The Cook Islands are a group of 15 small islands that are spread over 2 million sq. km in the South Pacific Ocean. The 15 islands are geographically divided into the Northern and Southern island groups.

How do I get to the Cook Islands?

The Cook Islands lies halfway between New Zealand and Hawaii, boasting an idyllic climate, endless adventure, romance and pure relaxation. Getting here is easy with flights on Air New Zealand, Jetstar and Air Tahiti as well as domestic flights between the islands with our national carrier Air Rarotonga. Walk the beaches less travelled.

How many islands are in the Cook Islands?

The Cook Islands comprise 15 islands split between two island groups, which have been called individual names in indigenous languages including Cook Islands Maori and Pukapukan throughout the time they have been inhabited. The first name given by Europeans was Gente Hermosa (beautiful people) by Spanish explorers to Rakahanga in 1606.

Are the Cook Islands self governing?

The islands are self-governing in "free association" with New Zealand. Under the Cook Islands constitution, New Zealand cannot pass laws for the Cook Islands. Rarotonga has its own foreign service and diplomatic network.
