The Corvus Orca ESS represented a shift in the maritime industry when launched in 2016. No other Energy Storage System can compete with the installation count of the Corvus Orca. Offering outstanding results and the highest level of safety, it set the new industry standard for maritime batteries. Corvus Energy combined industry-leading research ...

With headquarters in Canada and Norway, Corvus provides high power energy storage in the form of modular lithium ion battery systems. As demand for battery-powered vessels continues to grow, the company recently decided to expand and build new facilities in Canada and Norway in a bid to improve its battery production capacity.

Corvus Orca Energy The Orca Energy ESS represented a shift in the maritime industry when launched in 2016. No other Energy Storage System can compete with the installation count of the Orca Energy system. Outstanding results and the highest level of safety has set the new industry-standard for maritime batteries.

The same year Corvus Energy also announced their partnership with Toyota Motor to develop marine fuel cells based on Toyota fuel cell technology. and in November 2023, Toyotas invested in Corvus through their investment company Woven. "To have the Japanese type approval in place is an important milestone for Corvus.

This is the second article in a series highlighting the five remarkable design features incorporated into Corvus Energy's Orca(TM) Energy Storage System (ESS) product line design--a design that earned Corvus ...

The Corvus Orca ESS, the most installed marine energy storage system worldwide, set the industry standard for maritime energy storage reliability and safety. The Blue Whale design incorporates the unsurpassed safety features of the Orca, and additionally provides key advances required to meet the energy demands of large vessels.

The Corvus BOB is designed to house the Corvus Orca, the marine battery energy storage system with the highest installation count worldwide and an industry-leading safety profile. 10 ft. Corvus BOB. 20 ft. Corvus BOB. Contact ...

The eWolf is equipped with a Corvus Orca ESS, the most installed marine energy storage system worldwide, used onboard over 700 maritime vessels around the world. The eWolf is outfitted with a 6.2 MWh ...

In total, 100+ projects utilize Corvus ESS, now totalling over 75MWh and 1.5 million operating hours. Corvus has unsurpassed experience and knowledge that enables revolutionary innovation. Human Safety at Sea. The Orca whale is often maligned as a "killer" whale. The simple truth is that humans are not at risk from Orca

whales at sea.

Corvus Energy combines industry leading research, development, capabilities and knowledge gained from having the largest global installed base of ESS solutions. This results in the segments highest performing, safest, reliable and cost-effective product-line which includes: Corvus Orca, Corvus Dolphin, Corvus Moray and Corvus Blue Whale.

In November, Corvus announced participation "in the innovative Crowley eWolf zero-emission tugboat project has expanded with an order to supply shoreside battery energy storage systems (ESS) using two ...

This is the second article in a series highlighting the five remarkable design features incorporated into Corvus Energy's Orca(TM) Energy Storage System (ESS) product line design--a design that earned Corvus Energy the Electric & Hybrid Marine Technology 2017 Innovation of the Year award, as well as the BC TIA Technology Impact Award for Excellence ...

The eWolf is equipped with a Corvus Orca ESS, a marine energy storage system used on board more than 700 maritime vessels around the world. The eWolf is outfitted with a 6.2-MWh Corvus Orca system and is capable of operating daily at full capacity using battery power alone. Battery-powered operations require zero fuel and produce zero emissions ...

The eWolf is equipped with a Corvus Orca ESS, the most installed marine energy storage system worldwide, used onboard over 700 maritime vessels around the world. The eWolf is outfitted with a 6.2 MWh Corvus Orca system and is capable of operating daily at full capacity using battery power alone. Battery-powered operations require zero fuel and ...

Corvus Energy reports that its Corvus Orca energy storage system has become the first marine ESS to receive type approval from Japanese classification society ClassNK. "The pace of social change is accelerating, necessitating an increased effort to move forward with frontrunners to tackle these challenges," said Masaki Matsunaga, executive vice president / ...

Kawasaki Heavy Industries selects Corvus Orca ESS for battery-powered propulsion system on board all-electric Asahi Tanker vessel. Bergen, Norway and Vancouver, Canada - Corvus Energy is pleased to announce that Kawasaki Heavy Industries has selected Corvus Energy to supply the energy storage system (ESS) for the first zero-emissions electric ...

Corvus Energy re-invents the maritime ESS with the Orca ESS product line, setting new standards of safety, performance and economics. Richmond, B.C - June 20, 2016 - Corvus Energy, the world's leading manufacturer of lithium-ion based energy storage systems (ESS), is pleased to announce the introduction of its next generation product line, Orca ESS.
