

Cost of solar New Caledonia

How much energy does New Caledonia use?

Nickel refining is energy intensive and the sector is by far the greatest user of energy in New Caledonia, at around 75-80% of total usage. Each of the three largest refineries uses approximately 100-200MW of power, collectively some 500-600MW. The power generation infrastructure at SLN is aging and parts are up to 50 years old.

Where is wind power used in New Caledonia?

Wind power is a small part of the renewable energy market in New Caledonia and is used mainly at nickel refineries or as a back-up power source. The towns of Voh and Mont-Dore, home to the two main wind farms, are each also home to a nickel refinery. French companies also dominate this market segment.

Does New Caledonia have a wind farm?

To date New Caledonia has no offshore wind farms. Biomass energy production in New Caledonia only occurs at the Ouvéa (Fayaoué) power plant. This power plant, with a capacity of 300 kVA, consists of a generator running on diesel and coconut oil from a local coconut oil factory.

What is New Caledonia's energy mix?

New Caledonia's energy mix consists of 97.7% fossil fuels, including 54.1% petroleum products (mainly fuel oil and diesel), 43.6% coal, and 2.3% renewable energies. The metallurgical industry consumes 61.2% of the total energy consumption of the territory.

Which French energy companies are in New Caledonia?

There are a number of French energy companies present in New Caledonia, including Total, Engie and Vergnet, which are well-placed to deliver most of these projects. Government efforts are largely being funded by carbon and energy transition taxes at the pump on petrol and diesel, but they are also looking to secure funding from France and the EU.

What is New Caledonia's energy transition plan?

Under its Energy Transition Plan New Caledonia plans to intensify research in renewable energy sources, establish regulatory standards (for example in transport and hydrogen), and ensure climate change is considered in all future public policy.

If you pay for your system with cash, you'll save about \$34,539 over 25 years (the warranty term of most solar panels) on electricity costs with a 5 kW system in Caledonia, MI. We generate this estimate based on real solar quote data from our Marketplace. It considers your system's cost, the federal tax credit, and inflation rates.
