

Cuba solar company in city

Is solar energy a viable energy source in Cuba?

But, like most Caribbean nations, Cuba has immense potential for energy generation from renewable alternatives, including solar energy, which can be utilized to meet domestic and small business needs. Cuba's renewable energy output is small, estimated to be at about 4% of its overall production in 2012.

Where are the solar panels made in Cuba?

The solar panels used in the project are partly produced by the Cuban Electronic Industry -70 percent of all the solar panels were assembled in Pinar del Rio, and 100 percent were installed by the Copextel company ran by the Ministry of Computer Science and Communications (MIC).

How much solar energy is installed in Cuba?

The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity. And there are several projects underway to increase this percentage, although costs remain a serious obstacle. Increase in energy production from solar devices in Cuba since 2001:

Can Cuba build a solar power plant?

The loan should partly help finance four 10 MW solar power plants. Beyond that, the Cuban government has a long way to go if it is to build the planned 700 MW of solar capacity and secure the \$3.5 billion that are necessary to fund its vision of a countrywide energy transformation.

How will solar energy impact Cuba's energy demand and production?

For solar energy to have a long-term impact on Cuba's energy demand and production, projects must expand beyond off-grid usage. The focus should shift toward urban applications of solar systems and the further development of solar-powered domestic appliances.

Does Cuba have a solar farm?

Although solar energy projects have thus far been limited to remote areas, capacity has increased considerably in recent years. In 2013 Cuba's first solar farm opened in Cantarrana, near Cienfuegos, with a capacity of 2.6 MWp.
