The development of wind energy in the Czech Republic also continues apace. The Czech government plans to triple the installed capacity from wind power by 2030, from the current 350 MW to 1 MW. There are several reasons for this overall positive attitude of Czechs towards renewable energy and the declared support of the Czech government.

In terms of renewable energy, Czechia has set a 20.8% share of energy from renewable sources in gross final consumption of energy in 2030 as renewable energy contribution to the EU renewable energy target for 2030. This level of ambition is below the share of 23% in 2030 that results from the formula contained
