CEZ, the Czech Republic's state-controlled energy group, has chosen the UK's Rolls Royce as its partner to develop small modular reactors (SMRs). The decision is a blow to rival bidders Westinghouse and GE Hitachi of the US. Westinghouse was also a failed bidder for the EUR16bn tender to build two new nuclear reactors at the Dukovany nuclear power plant site, in what will ...

Czechia approved a new National Energy Policy (SEP) aiming to reduce energy consumption and improve the economy's energy intensity. However, reaching the targets of the SEP will require greater effort if the country is to play its part in the global energy transition.

Czechia is in the midst of an energy crisis. Like most of the EU, the country is suffering from a dependency on Russian energy sources; sanctions on Russia aimed at cutting this dependency following the invasion of Ukraine have turned the European energy market upside-down and Russian President Vladimir Putin is turning the screw by strangling gas supplies.

Government spokesperson Miluse Trefancová said that the government's price ceiling - of CZK 6/kWh hour of electricity and CZK 3/kWh of gas - and energy-saving tariffs (worth up to CZK 3,500 per person) have aided the situation. Critics, however, say that the government acted too late and that the caps were higher than they needed to be.
