

DR Congo esphome easun

Hello, And thanks, for the config for new Easun 11kW inverter. I'm currently trying to make it work with Home Assistant. I'm looking for modbus protocol spec for this model as some parameters are missing in your config. Do you have compl...

Hi everyone! I've successfully connected the JK-PB2A16S-20P (via CANbus, for reference, I'm currently connecting via the LI4 program, and you need to select UART1 Protocol no. 6 - Growatt), and now I'm looking for a way to connect something else instead of the WiFi dongle for the ISolar-SMG-II-4KW-24V-WIFI inverter.

Czesc ! Na wstepie powiem ze jestem poczatkujacy w HA wiec prosze nie bic ? Mam nastepujacy problem : Jest sobie Home assistant z postawionym brokerem MQTT + Bridge do Supla Do brokera mqtt wysyla ...

Full function gateway for getting and settings values via serial port between voltronics inverters and Home Assistant. After flash via Xloader to Arduino Mega 2560, please load default settings, by connecting pin 40 and GND and restart arduino. Default ip adress is 192.168.0.122, default logins are user/user or admin/admin. In webinterface, set MQTT ...

Snad moje práce nekomu pomuze :) Zakoupil jsem si tento MPPT regulátor EASUN MPPT 8048 a nikde jsem nenasel zádný software pro komunikaci, ani zádný zpusob jak Fórum MyPower . Fórum o fotovoltaických elektrárnách, bateriích, panelech, menicích a energetické sobestacnosti ... ESPhome pro EASUN MPPT8048. HomeAssistant ...

Peak Power Tracking: Harness solar energy most efficiently with 100% MPPT technology that intuitively tracks the maximum power point. Intelligent DSP Core: A sophisticated DSP controller sits at the heart of the system, delivering high performance and stability. Smart Voltage Recognition: Automatically discerns and adjusts to the connected battery's voltage ...

Suppress full config output of "esphome config" when -q option is used. esphome#5852 by @clydebarrow. Checks for pins used in multiple places esphome#5666 by @clydebarrow (breaking-change) Nextion support to idf with cinttypes esphome#5876 by @edwardtfn. Fix test4.yaml after #5666 esphome#5890 by @kx81.

Modbus Controller¶: The modbus_controller component creates a RS485 connection to either: control a Modbus server (slave) device, letting your ESPHome node to act as a Modbus client (master). You can access the coils, inputs, holding, read registers from your devices as sensors, switches, selects, numbers or various other ESPHome components and present them to your ...
