What does Das Energy specialize in?

Das Energy specializes in marketing, mechanical and electrical engineering, turn-key installation, supervision, and servicing of new and second hand power plants and procurement and installation of all related auxiliary mechanical and electrical equipments.

Where can I find Das energy PV modules?

All currently available DAS Energy PV modules can be found in the DAS Kraftwerk webshop. Not every roof is dependent on light photovoltaic modules - DAS Energy also offers conventional glass modules for photovoltaic projects in every size and performance class. 12x2M project module - specially designed for standing seam rooftops

How many megawatts a year does Das energy produce?

In the process, the technology is constantly being further developed in the research and development center. The production capacity is currently 55 megawatts per year. DAS Energy founder and CEO Christian Dries has a background in the aviation industry, having founded Diamond Aircraft and running the enterprise successfully for many years.

Where are Das energy system engines being overhauled?

Das Energy System has started the overhaul of 2 engines in Farafra, Egypt. Das Energy System has started the overhaul of 2 engines in Farafra, Egypt. Below are the some photos from our ongoing installation work in Myanmar.

DAS Energy Ltd. | 1,653 followers on LinkedIn. Leichte & flexible Photovoltaik zum Kleben Made in Austria | We take photovoltaics to new horizons. Headquartered in Wiener Neustadt, Austria, DAS Energy Ltd. developed a new generation of lightweight, flexible PV modules opening a new world of solutions for all rooftops & facade projects, as well as mobile and off-grid requirements.

Our pioneering work in photovoltaic technology started in 2010. Christian Dries, founder and CEO of DAS Energy Ltd., and his team developed the world's first photovoltaic modules embedded in glass fiber reinforced composite material. ...

DAS Energy product features Flexible and Lightweight 3.3 kg/m<sup>2</sup> . We replace the traditional glass pane with a highly transparent composite material, allowing us to attain a weight of just 3.3 kg/m<sup>2</sup>. This is significantly lower than traditional glass modules, which weigh on average over 20 kg/m<sup>2</sup>. This allows our modules to be installed on all roof constructions, including those unable ...
