

Denmark ips energy

How much energy does Denmark import?

Denmark imports around 12% of its energy (this statistic includes all forms of energy, not just electricity). Denmark has drastically decreased production of electricity from coal, in 2019 it was less than 11% and will cease in 2024.

How much does electricity cost in Denmark?

Denmark has average electricity costs (including about DKK 5 billion in costs for cleaner energy) in EU for industries at 9 eurocent /kWh, but general taxes increase the household price to the highest in Europe at 31 eurocent/kWh. Transmission costs are around 1c/kWh, and support regimes cost 2 1/2 c/kWh in 2014.

What percentage of Denmark's energy supply is oil?

In 2022, oil represented 37% of Denmark's Total Energy Supply (TES), in line with the International Energy Agency (IEA) average of 35%. Its stable share over the past decade saw a slight decrease in Total Final Energy Consumption (TFEC) from 45% in 2011 to 38% in 2021, primarily due to shifts in the transport sector.

How has Denmark's energy sector changed over the past decade?

Over the past decade, Denmark's energy sector has seen significant changes, characterized by a decrease in the total energy supply (TES) and shifts in the energy mix. The TES declined from 812 Petajoules (PJ) in 2010 to 671 PJ in 2019, then slightly increased to 678 PJ by 2022.

Why did Denmark rethink its energy policy?

The 1973 oil crisis forced Denmark to rethink its energy policy; in 1978 coal contributed 18%, and the first wind turbine was built, along with the creation of a wind turbine industry. The 1979 energy crisis pushed further change, and in 1984 the North Sea natural gas projects began.

Does Denmark use nuclear power?

The production of nuclear energy has been banned in Denmark since 1985. In 2014 and 2015, (imported) nuclear power was 3-4% of electricity consumption in Denmark. An average of 10% of domestic energy consumption comes from imports from neighboring countries Sweden and Germany, which both generate nuclear power.

At IPS, we are dedicated to creating an immediate digital future for global energy supply. IPS offers a wide range of software solutions to understand and manage data better. We provide our customers with products and services for asset and network data management, supported by advanced analytics, investment planning, outage management, mobile ...

We offer a comprehensive solution software platform specifically designed for power utilities. We specialize in developing and delivering a wide range of asset and network data management tools enhanced by advanced
