Set a reminder for a couple of months to check them. Lithium ion batteries have virtually no self discharge under 4.0V but there can be battery monitoring which draws a small amount. A good aspect, sometimes derided, is that Dewalt have their low voltage cut off in the tool, not the battery so no current draw from that.

The DeWALT instructions provided w/ every tool are very clear. They also make sense. The printed instructions state: "Do not store or use the tool and battery pack in locations where the temperature may reach or exceed 104 °F (40 °C) (such as outside sheds or metal buildings in summer). For best life store battery packs in a cool, dry location."

Power up with this 3 Pack of 20V MAX\* Lithium Ion Batteries. It includes one DCB206 6.0Ah XR Battery,

Question about DeWalt 20v battery storage. I've recently come into a handful of the 20v lithium ion batteries of various sizes. Following DeWalt's instructions, these do not have to live on the chargers and will not lose charge over time. My question is about storage temperature. The instructions clearly state not to charge them in temperatures ...
