A Quick Solar Panel History. Alexandre Edmond Becquerel was the first scientist to discover the photovoltaic effect in 1869, which describes how energy is harnessed from sunlight. In 1941, Russel Ohl invented the solar cell, a small thermal conductor that absorbs light by heating the cell and transferring power through direct heat or indirect power from heat ...

Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates.

Solar panel prices in the Philippines are affordable for the average household. What's more, homeowners are noticing up to 50% reduction in their monthly utility bill. Solar panels can pay for themselves in 5 years, and since each solar panel can last 25 years on average, it's considered better than a time deposit.
