

Dominican Republic mango power

Is the Dominican Republic a good place to grow mangoes?

A small country with favourable conditions for mango cultivation, the Dominican Republic is a newcomer to the international stage (for the past decade), with an incredible growth rate (7-fold increase in volumes in ten years), though still in modest quantities (14 300 t in 2014).

Where does the Dominican Republic export mangoes?

The Dominican Republic started to export mangoes from 2003. From 300 000 boxes in the first year, the volume climbed to more than 2.5 million boxes in 2014. Exports have constantly risen, especially to Europe, to a more than noteworthy level. The main destinations are Continental Europe with more than 80 %, and the Caribbean.

Where to eat mango in the Dominican Republic?

The Dominican Republic is known for its annual mango festival, where thousands gather to taste various types of mangos. Since the Portuguese introduced mangos to the Caribbean, they are widely available in the country, particularly in the mid-west and southwest coastal areas. Every year, a mango festival is held here.

What is the capital of mangos in the Dominican Republic?

Bani, the capital of mangos in the Dominican Republic, is famous for its large green and red mangos called Banilejo. Every year, a mango festival is held here, attracting thousands of people to taste various kinds of mangos. Since the Portuguese brought mango to the Caribbean, this fruit is widespread in the Dominican Republic.

How many types of mango are there in the Dominican Republic?

Mango Some say that there are 40 types of mango in the Dominican Republic, others talk about 100 and more. You can check this once a year at the beginning of summer: in the village of Ban#237;, the very one where mango ripens year-round, they organize a mango festival.

Which provinces produce mango?

Mangos are produced in several provinces of the Dominican Republic, including Dajabon, Espaillat, and La Romana. Mango trees, which can grow up to 60 feet (18.2 m) tall, require dry and hot periods to produce a good crop. They bear fruit from mid-April to the end of October.
