How does Armenia generate electricity?

Most of the rest of Armenia's electricity is generated by the natural gas-fired thermal power plants in Yerevan (completed in 2010) and Hrazdan. Upon gaining independence, Armenia signed the European Energy Charter in December 1991, the charter is now known as the Energy Charter Treaty which promotes integration of global energy markets.

Who is responsible for energy sector governance in Armenia?

The principal bodies involved in energy sector governance in Armenia include the Ministry of Territorial Administration and Infrastructure (MTAI), which is responsible for overall energy policymaking; the Ministry of Environment; the Public Service Regulatory Commission (PSRC); and the Committee on Nuclear Safety Regulation (ANRA).

Does Armenia use natural gas?

Natural gas represents a large portion of total energy consumption in Armenia, accounting for 50% and is the primary means of winter heating in the country.

Does Armenia have a surplus electricity sector?

The Armenian electrical energy sector has had a surplus capacity ever since emerging from a severe post-Soviet crisis in the mid-1990s, thanks to the reopening of the Metsamor Nuclear Power Plant, which was built in 1979 and supplies over 40% of the country's electricity.

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.

What is Armenia's biggest energy consuming sector?

As Armenia's largest energy-consuming sector, buildings account for around 40 percent of electricity demand and more than 25 percent of gas demand. Significant market opportunities for increased efficiency exist, particularly in home heating. Ministry of Territorial Administration and Infrastructure
