

The idea of a cross-country road trip in an electric vehicle might seem daunting. Minimizing the number of charging stations you visit and your time at them is key to efficient road-tripping in ...

Basic Energy Corp. (BEC) is hopeful that its subsidiary, Basic Energy Renewables Corp., will be able to seal a deal next month with a leading electric vehicle (EV) charging company to deploy ...

Neural networks offer predictive capabilities for forecasting charging demand, optimizing charging schedules, and mitigating peak load demands on the grid. Real-world implementations and ...

The increasing share of electric vehicles (EVs) offers many advantages, including a reduced CO2 footprint over the vehicles' lifetime and improved resource efficiency through the recycling of ...

Introduction In an electric vehicle (EV) conversion, selecting the right on-board charger (OBC) is critical to ensuring charging efficiency, safety, and compatibility with your powertrain system. ...

This study highlights the importance of data-driven strategies in optimizing electric vehicle (EV) charging infrastructure. Key metrics such as power consumption efficiency, station utilization, ...

The rapid increase in electric vehicles (EVs) has significantly impacted power systems, necessitating the implementation of coordinated charging and discharging strategies to ...

Electric vehicles (EVs) are a transformative force in sustainable transportation, but their widespread adoption depends critically on the development of robust and intelligent fast ...

The idea of a cross-country road trip in an electric vehicle might seem daunting. After all, it's not hard to envision getting stranded on the side of the road with a depleted battery or being stuck in a parking lot, charging for hours. But there ...

Ultrafast charging tech lets plug-in electric vehicles hit 80% in 15 mins--see what's next for EVs as China leads in 1,000 kW innovation. Discover how to stay ahead with forward-looking ...

Reinforcement learning-based load forecasting of electric vehicle charging station using Q-learning technique. IEEE Transactions on Industrial Informatics, 17 (6), 4229-4237.

This paper presents a stochastic optimization framework for microgrid (MG) energy management, integrating electric bicycle (E-Bike) and electric vehicle (EV) charging stations with a green ...

Electric vehicle charging techniques

A1: The "best wall charger for electric car" home use is typically a Level 2 EVSE (Electric Vehicle Supply Equipment). These chargers connect to a 240-volt circuit in your home and provide ...

Today's electric freight charging depot and multi-purpose hub builds on New York City's Green Economy Action Plan announced in 2024 that aims to activate electric vehicle charging ...

The transition to electric vehicles (EVs) is a cornerstone in the global effort to pave the way for smart cities and carbon neutrality. With the rapid growth of the EV market, the demand for innovative charging and vehicle-to ...

This paper presents a hybrid fast charging strategy for static wireless power transfer (WPT) systems that synergistically combines pulsed current and multi-stage current (MCM) modes to ...

First, it can improve the convenience and flexibility of charging electric vehicles. By building an intelligent charging infrastructure and promoting vehicle-to-grid technology, electric ...

In this work, various power converter topologies use control logic for electrical vehicle (EV) fast charging applications. The power converter topologies evaluated in this study include Luo ...

With the increasing adoption of electric vehicles (EVs) globally, there is a growing need for more public charging infrastructures, which demands compact designs to minimize their cumulative ...

Understanding electric vehicle charging is key to a smooth and worry-free journey. This guide will help you power up your vehicle with ease, whether you're at home or out and about. Choosing ...

As part of the British government's recent £63 million boost for electric vehicle adoption, EV charging "gullies" are being supported, aiming to prevent cables from trailing across ...

A review on impact analysis of electric vehicle charging on power distribution systems. In 2020 2nd International Conference on Smart Power & Internet Energy Systems (SPIES) 420-425 ...
