

In the data Statistics Norway receives from Elhub the values of metering points in sub-grids have been included by mistake. Due to this fact the figures of the annual electricity statistics have been revised back to 2020. For ...

In gas, a transition energy that complements the intermittency of renewables in electricity generation and is a virtuous alternative for countries burning coal for power generation, TotalEnergies estimates that its LNG sales ...

A long history of recycling Swedish recycling history goes back quite some time. Households started sorting waste in the 1980s - first glass, then paper and cardboard followed suit. Plastic recycling got going in the 1990s ...

Die Energy-Charts bieten interaktive Grafiken zu: Stromproduktion, Stromerzeugung, Emissionen, Klimadaten, Spotmarktpreisen, Szenarien zur Energiewende und eine umfangreiche Kartenanwendung zu: Kraftwerken, ...

Sweden is a world-leading country when it comes to green energy, with around 98 per cent fossil-free electricity production. More than 70 per cent of that comes from renewable sources, the rest from nuclear power. The ...

The strategic use of nuclear power, along with renewable sources like hydro, wind, and solar energy, demonstrates Sweden's commitment to a balanced and sustainable approach to energy generation.

On a year-to-date basis, total net electricity production increased by 3.0% in the first four months of 2025. Electricity generation from fossil fuels increased by 1.1% year-on-year in the OECD in April 2025. Generation from ...
