

Energy and infrastructure companies Ireland

Why is Ireland investing in energy storage solutions?

Ireland is also investing in energy storage solutions, such as battery systems, to enhance grid stability, continues Blanchfield. "A more stable grid will allow for better utilisation of renewable energy from various sources."

Who is RWE renewables Ireland Limited?

RWE Renewables Ireland Limited (RWE) has been in Ireland since 2016 and has two offices, one in Kilkenny City and one in Dún Laoghaire, Co Dublin. RWE has established itself as a key player in the Irish energy market with an expanding portfolio of projects, currently including 12 projects in development and 4 in operation.

Is wind energy a cleantech solution for Ireland?

Wind energy is just one of a wide range of cleantech solutions that Ireland can utilise, says Blanchfield: "Wind energy plays a significant role, accounting for more than 30 per cent of electricity generation [but] Ireland is diversifying its cleantech portfolio."

How will the 2024 energy year impact Ireland?

This could have several implications for the 2024 energy year in Ireland. Opportunities for renewables growth will need to be consolidated with issues like mandates for energy efficiency and accommodating for large energy users. We need to ensure that short-term challenges do not restrict opportunities for long-term growth.

Why do we need a cleantech ecosystem in Ireland?

Together, these technologies are pivotal in addressing global environmental challenges." Ireland boasts a growing cleantech ecosystem, particularly in renewable energy, with a strong presence in onshore wind, says Stephen Prendiville, sustainable infrastructure leader, Deloitte.

Is Ireland a global leader in cleantech innovation?

Ireland has a significant opportunity to position itself as a global leader in cleantech innovation, in Blanchfield's view. "With a highly educated workforce and a strong legacy of creativity and invention, Ireland is well placed to drive meaningful advancements in the sector," he says.

To support this goal, SSE Renewables is developing the Galway Hydrogen Hub (GH2) project, as part of a seven member consortium. GH2 will position Galway as the home of Ireland's first hydrogen valley, providing green hydrogen for use in transport, industry, and within local communities in the greater Galway region.
