

Energy companies Kiribati

The more specific objective of the KGES is in expanding the use of renewable energy through the application of solar photovoltaic on outer islands and in urban districts. This complies with the government policy to provide rural ...

Kiribati is highly dependent on petroleum imports for electricity generation. Petroleum use consists of petrol, diesel and kerosene. Kiribati gets 94% of its energy from oil and gas products, with the remainder from biomass (2008). The Public Utility Board (PUB), 100% government owned, supplies diesel generated power in South Tarawa.

The South Tarawa Renewable Energy Project (STREP or the Project) will support upscaling of solar power generation in Kiribati. The Project will reduce dependence on fossil fuel imports by increasing the renewable energy (RE) percentage of electricity generation. STREP has three outputs: (i) solar photovoltaic and battery energy storage system installed; ...
