

The first law of energy, also known as the first law of thermodynamics, is a fundamental principle in physics that describes the conservation of energy. Simply put, it states that energy cannot ...

The Victorian Energy Upgrades program helps Victorians cut power bills and reduce greenhouse gas emissions. Households can receive rebates or discounts on a range of energy-saving products. Find out more about ...

Conservation of energy, principle of physics according to which the energy in a closed system remains constant. Energy is not created or destroyed but merely changes forms. For example, in a swinging pendulum, potential ...

These findings confirm that atmospheric energy sources can be dependable "lifeline" substrates that enable continuous energy conservation during nutrient starvation. In addition, this work ...

Discover how catchy energy-saving slogans can inspire individuals and campaigns to embrace conservation for a greener future. This article explores the power of memorable phrases in motivating action, providing effective ...

A new wind farm and battery storage project in central Victoria is now inside the state's planning machinery, as Acciona moves into the next phase for its proposed 330 megawatt (MW) Tall ...

Energy conservation is the practice to conserve natural resources from depletion. it is because energy drives everything in today's world. The entire world consumes more energy than before, and so the demand for energy is ...

Over 2.2 million Victorian households have benefitted from the program since 2009. The VEU program will save 28 million tonnes of greenhouse gas emissions for Victoria between 2022 and 2025. That's equivalent to taking ...

The Energy Conservation (EC) Act, 2001, under Section 14, Clause (e) and (f), empowers the Central Government to set guidelines for energy audits and designate high-energy-consuming industries as DCs.

Victoria's net greenhouse gas emissions for 2022 were 84.7 megatonnes of carbon dioxide equivalent (Mt CO₂-e). This is a 31.3% reduction in emissions from 2005 levels. This is within the 2025 target range of reducing ...
