Live dashboard showing recent code activity and community verifications at Enphase Energy. See which codes work, which fail, and when they're used for a purchase. Screenshots from other shoppers help reveal any ...

Thank you for responding. We have an Envoy-R-NA. We tried using the default password "public" but that did not work. Are the username and password for the Envoy-R-NA different? Also if ...

The phone app and web site <https://enlighten.enphaseenergy.com/web/> match each other but not what I can get from any endpoint I can find in the local api (so far). The "Production" values ...

Well, there's DC and AC; those may be 370-Watt nameplate panels, but in reality, the PTC rating is about 89% less. You can find your solar panel's PTC rating here: [The PTC rating is the real ...](#)

So, which circuit breaker tripped? Assuming this is the breaker which controls power to your Gateway (Envoy). So, for 4 years, Gateway has not reported to the Enlighten Cloud -- how do ...

I have a gateway and I am currently monitoring consumption and production in the building that I have the solar on. I have another building that is on the same electrical (main) hook up. I want ...

Why are the units inconsistent in the enlighten energy usage chart? If I look at my daily energy usage the units on the y axis are kWh. When I hover over a particular bar, a little pop up ...

I have an Envoy-R. I hope that's the answer you sought about what model of Powerline Ethernet bridge kit, otherwise I have no idea what that is. It has worked in the past. Then it wouldn't ...

Ask Enphase remote support for guidance, but I think you need to go to Enphase University ([university.enphase.com](http://university.enphase.com)) and get certified; it takes about 2 weeks to do. There is a final ...

OK, so 26 are working. I would still see about getting the panels replaced under warranty. Is the panel vendor still in business? If the panel is under warranty, then you may need to give the ...
