Can Eritrea lead the way to a sustainable future?

The world is at the tipping point for bolder steps and immediate aggressive actions. Eritrea, a country with negligible emission contribution, can potentially lead the way to secure a safe and sustainable future by taking a different path from previous development trajectories.

How much electricity does Eritrea have?

It is also working towards raising the share of electricity generation from renewable energy. According to the 2019 World Bank Global Electrification Database, 50.3 per cent of Eritreans have access to electricity, with electrification reaching 75.6 per cent and 36.6 per cent of the urban and rural population, respectively.
