

Gaf energy roof Saint Barthélemy

Does GAF energy install Timberline solar shingles?

Yes, GAF Energy uses a network of certified roofing and electrical contractors to install Timberline Solar shingles. These solar shingles are nailable, meaning that the actual "solar" shingles themselves can be installed by qualified roofers, along with the regular shingles on your roof at the same time.

Does GAF energy offer solar panels?

GAF Energy only offers Timberline Solar shingles and doesn't offer solar panels. And the company technically doesn't install them. A GAF-certified contractor will be the one putting solar on your roof. You'll be able to monitor your solar roof's electricity production through the GAF Energy homeowner portal.

Does GAF energy sell solar shingles?

Instead of dealing in solar panels, which get mounted to roofs on metal racks, GAF Energy sells solar shingles, called Timberline Solar, that nail into roofs like any old asphalt shingle. The shingles sit flat against the roof, with electrical components housed in conduit on the front of each one.

Which solar inverter does GAF use?

GAF Energy uses Delta and SolarEdge string inverters. SolarEdge inverters are widely distributed, highly efficient and offer a solid warranty. They also won the top spot on CNET's best solar inverters list. Delta inverters are a solid option as well, but we found SolarEdge to be the better choice of the two. What about solar batteries?

GAF Energy celebrates new Timberline Solar manufacturing facility in Georgetown, Texas. Georgetown, TX - Community and company leaders celebrated the opening of GAF Energy's new 450,000-square-foot Timberline Solar(TM) manufacturing facility in Georgetown, Texas, at a ribbon-cutting event today. GAF Energy, a Standard Industries ...

EnergyGuard(TM) NH Ultra Tapered Polyiso Insulation systems are a series of tapered and fill panels that, when properly installed on a low-slope roof, help drive water to the drain, thus prolonging the life of your roof system. Available in 1/16", 1/8", 3/16", 1/4", 3/8", and 1/2" per foot slope, in both standard and extended panels.

At GAF Energy, we always say the best time to go solar is when you're getting a new roof. For California customer Eli W., doing both projects at the same time--by the same team--also made sense financially. "Economically, it worked out better than going with two separate companies," Eli said about his Timberline Solar(TM) installation by GAF Energy partner ...

Timberline Solar(TM) protects like a roof, installs like a roof - and produces clean energy. This is the future of roofing. Complete the form to the right to request a proposal. Our team will check out your roof, and get in
