

Georgia The cheapest solar energy system

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 11.89 kW solar panel system to cover their electricity needs, which comes out to \$31,693 before incentives. Prices range from \$26,939 to \$36,447, but after the federal tax credit, that drops by 30%.

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Can you save money with solar panels in Georgia?

Yes, you can save significant amounts of money with solar panels in Georgia. They can offset at least 50% of your power bill (a 5kW system) so that you can enjoy at least \$50 of savings or more.

Is it worth it to use solar energy in Georgia?

Yes, it is worth it to use solar energy in Georgia. Solar costs in this state have dropped by 45% in the past 5 years and are now at a historic low.
