4 ???· The Google Maps Platform Solar API is a service focused on helping accelerate solar and energy system installations. The Solar API generates detailed rooftop data based on Google's extensive geospatial data and computing resources in order to evaluate rooftop solar energy potential. Why use the Solar API. The API accepts requests for three ...

The Paris Agreement recognized the significant role of forests in climate change mitigating and adapting. It also emphasized the importance of the Reducing Emissions from Deforestation and forest Degradation (REDD+) mechanism as a vital tool for achieving the goal of limiting global warming to 1.5 °C above pre-industrial levels. This study aims to assess the ...
